SUMMARY

Enthusiastic **Full Stack Developer**, eager to learn new technologies and deliver the best results. Skilled in building scalable, high-performing applications while ensuring clean and maintainable code.

EXPERIENCE

Whitestone Infotech

September 2024 – March 2025

MERN Stack Developer

Surat, India

- Utilized **Redis** and **BullMQ**, to implement efficient job queuing and background processing, optimizing performance and scalability for asynchronous tasks.
- Integrated **AWS S3** for secure and efficient media storage.
- Implemented a **Voice Copilot feature**, enabling users to automate website interactions through voice commands, improving accessibility and efficiency.
- Built an **Automated Outbound AI Call System** using **ElevenLabs** and **Twilio**, for intelligent user follow-ups.

ReThink Financials

December 2023 – March 2024

MERN Stack Developer Intern

Remote, India

- Developed **dynamic PDF generation**, with Puppeteer for improved data presentation.
- Designed and developed forms with Formik and Yup libraries, ensuring robust form handling and validation.
- Created engaging and interactive **animations with Framer Motion library**, improving user experience.
- Leveraged **Redux** to manage and update data dynamically across components.

PROJECTS

Hostel Management System

December 2023 – March 2024

- Reduced **Excel work by 75%** by digitizing user centric hostel management.
- Implemented functionalities:** Secure User Authentication, Student Profile Management, Room Allocation, Fee Management, Leave Management, Report Management and **WhatsApp messaging** using WhatsApp-Web.JS.
- Integrated online fee collection** using Razorpay and enabled generation and downloading of fee receipts which saves approximately **5-10 minutes** for students as they do not have to visit Account office.
- Tech Stack:** React, Node, Express, MongoDB, JWT, Shadcn-ui, flowbite, recharts, Framer-motion, Yup, Formik, puppeteer.

Lost and Found Helper System for University

January 2023 – March 2023

- Built a **Google-authenticated** platform for students to retrieve lost items with **email notifications**.
- Managed item status functionality using React hooks** reducing the need for physical office checks and saving approximately **10-15 minutes** for students and reduce physical office visits approximately **by 50%**.
- Developed an **admin and coordinator portals** for user and item management, including CSV report generation.
- Featured in the University's Project Catalog** for future student reference.
- Tech Stack:** React, Node, Express, MongoDB, JWT, MUI, passport-google-oauth2.0, nodemailer.

SKILLS

Languages: C++, Javascript, HTML, C, Python

Technologies/Frameworks: CSS, Tailwind CSS, Bootstrap, TypeScript, NodeJS, React, ExpressJS, NextJS, ElectronJs, Redux, AWS (Beginner)

Databases: MongoDB, PostgreSQL, Prisma ORM, Drizzle ORM

Developer Tools: Git, GitHub, Gitlab, Postman, VS Code, Jira

EDUCATION

Dharmsinh Desai Institute of Technology, Nadiad

August 2020 – May 2024

B.Tech - Information Technology - CGPA - 7.97

Nadiad, Gujarat
